**HIGHTOP[®]
POULTRY EQUIPMENT**

Enterprise Survey

HIGHTOP® livestock farming equipment is a manufacturer located in Anping County, Hebei Province, North China. We are highly experienced on design, production, sales and marketing of metal poultry cage and poultry equipment. We have been in the business for 20 years and deal with everything from raw materials to finished products, with strict implementation of ISO 9001:2008 quality management system.

HIGHTOP® is your one-stop shop for poultry farm businesses.

We provide whole system products for poultry farm, including:

- Automatic battery cage for chickens, pigs, ducks, rabbits, and quails.
- Equipment for feeding, egg collection, egg grading, egg processing, manure cleaning and processing, environment control, etc.

With our innovative technician team and professional sales team, HIGHTOP® always gives the best solution for farmers and poultry products distributors.

We try to cover all-around service, from designing, manufacturing, shipment, installation to training. The goal is to provide customers solutions that are easy to understand and operate, and never be expensive.

As our clients, you can count on impeccable quality and sustainable product policy. Guaranteed!

Since our company was founded we have always adhere to the principles of reputation as the basis, strategy of development through quality, improvement boosted by meditation and pursuing the future based on learning.

Company Culture

Our vision: To be the best possible practitioner of new-style poultry farming

Our mission: To steadily enlarge our clients' value through our products and services.

Our value: To service the clients, fulfill the employee and dedicate the society;

Our Enterprise Spirit: Tenacity, innovation, cooperation and learning.

HIGHTOP® is expecting to cooperate sincerely with both old and new clients in order to achieve win-win cooperative situation.

A-5. Automatic breeder cage

Breeding cages are mainly used to obtain fresh fertilized eggs, which is an essential equipment for large farms. Producing fertilized eggs by ourselves can not only reduce the cost but also obtain quality fertilized eggs.

Automatic breeder cage include:

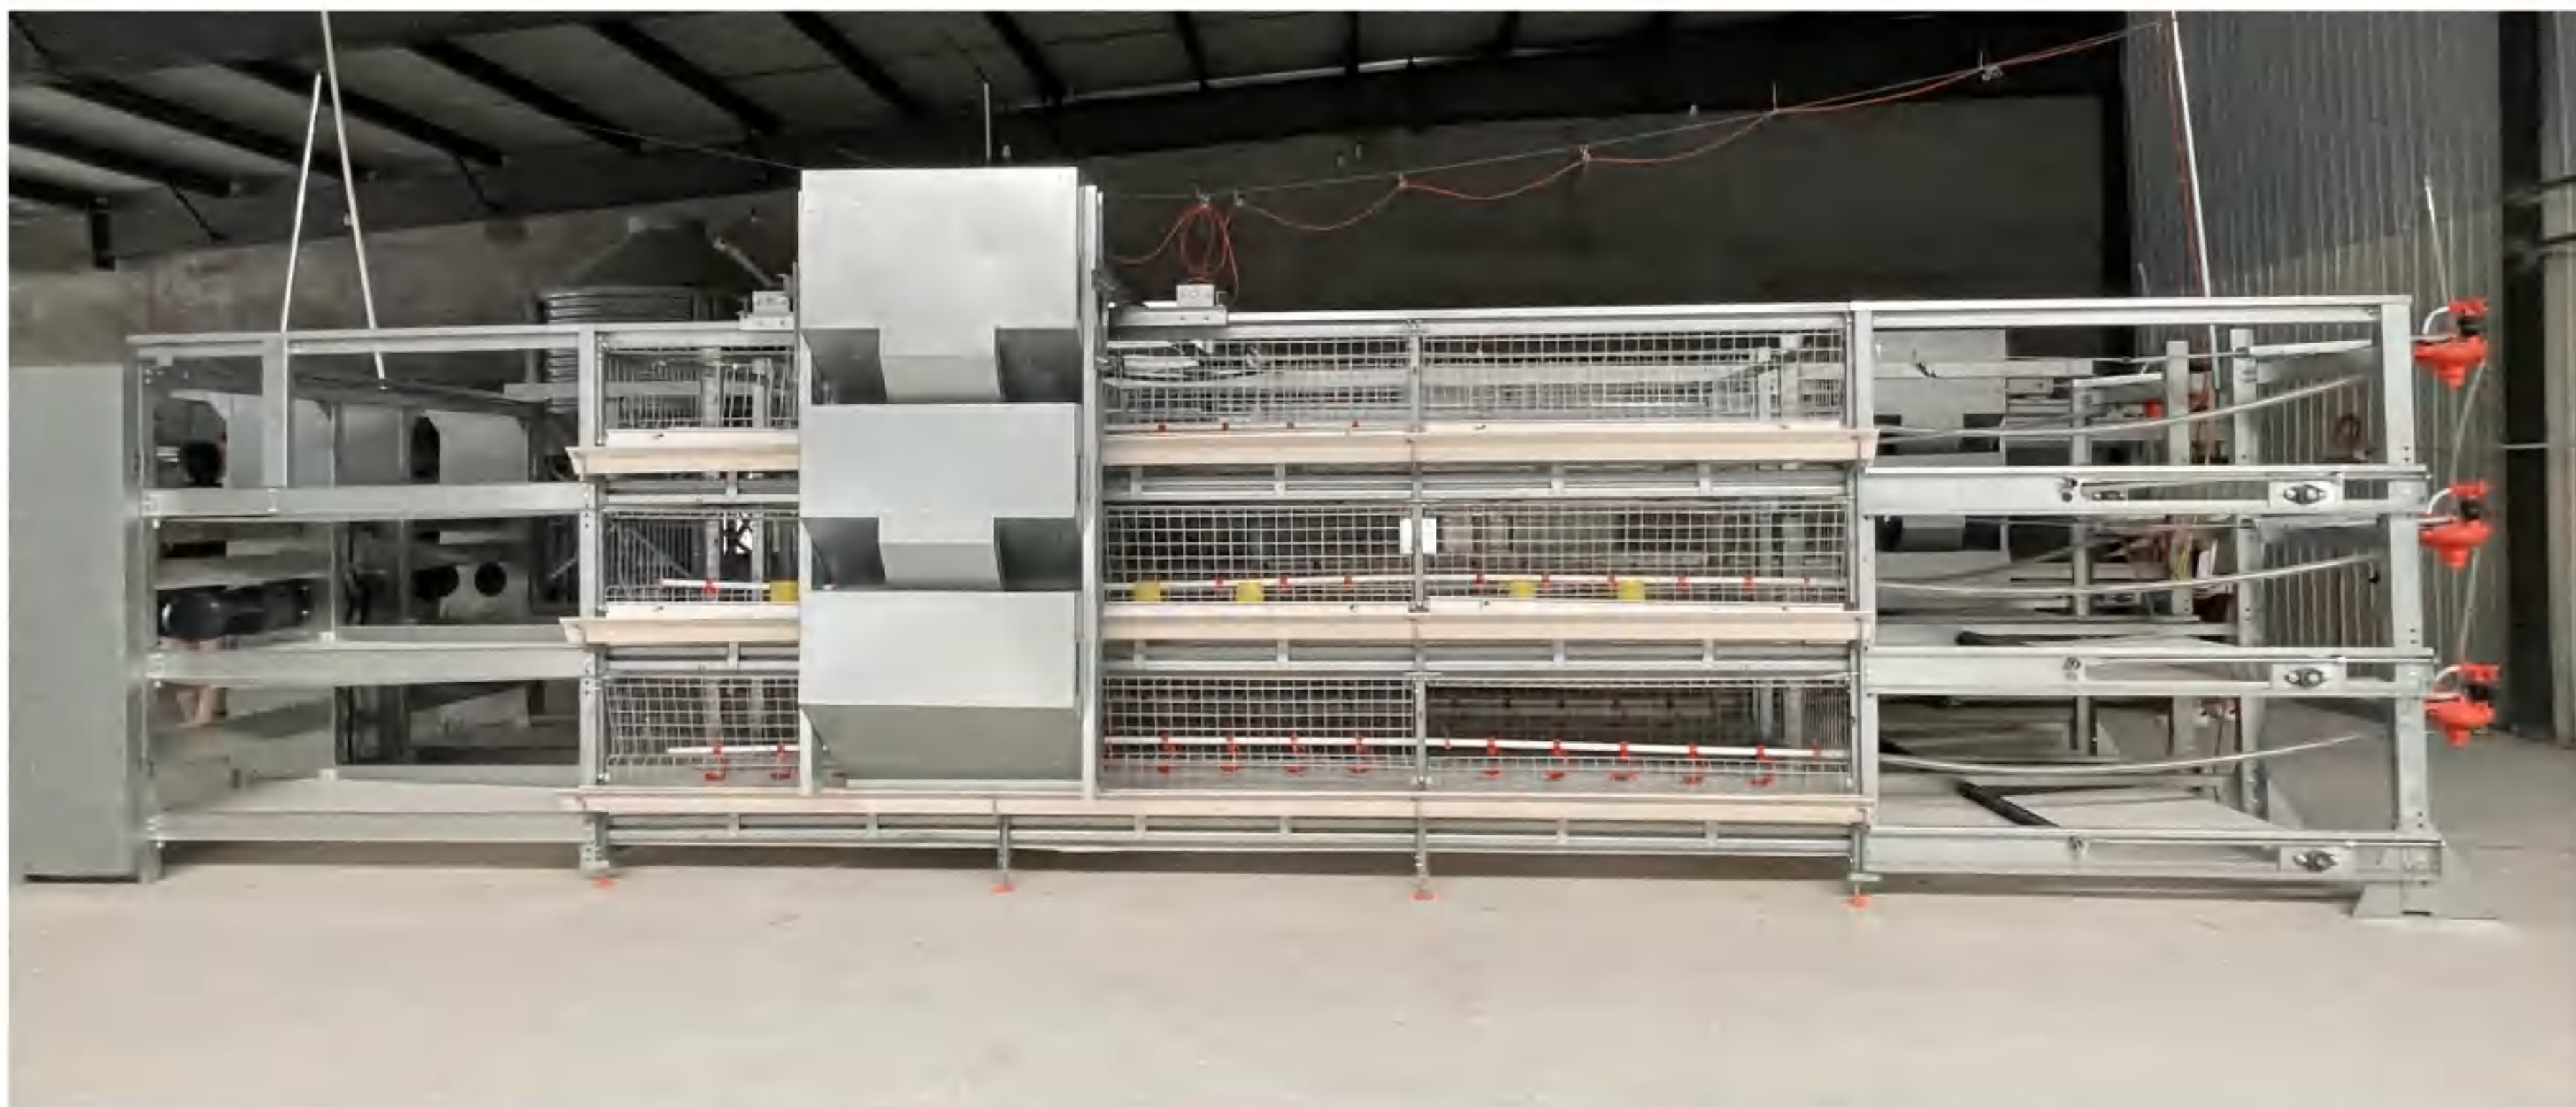

- Auto cage system with auto drinking line
- Auto feeding machine
- Auto manure cleaning machine
- Auto egg collection machine

A-6. Automatic broiler cage

H type automatic broiler cage include:

- Auto cage system with auto drinking line
- Auto feeding machine
- Auto manure cleaning machine
- Auto environment control system
- Auto lighting system
- Auto brooder heating system

Cage size	No. Of cells/set	No. Of birds/door	No. of tiers	No. of Birds/set	Area per head (cm ²)	Length of the cage with frame	Width of installed cage with feeding machine	Height of installed cage with feeding machine
1400*1000*450	3	37	3	113	378	1450	1050	2560

A-7. Automatic feeding pan system

HIGHTOP® CHICKEN CAGE

1. main stock line
2. broiler pan feeding system
3. nipple drinking system
4. ventilation system
5. Agrologic T607 environment controller
6. Heater System

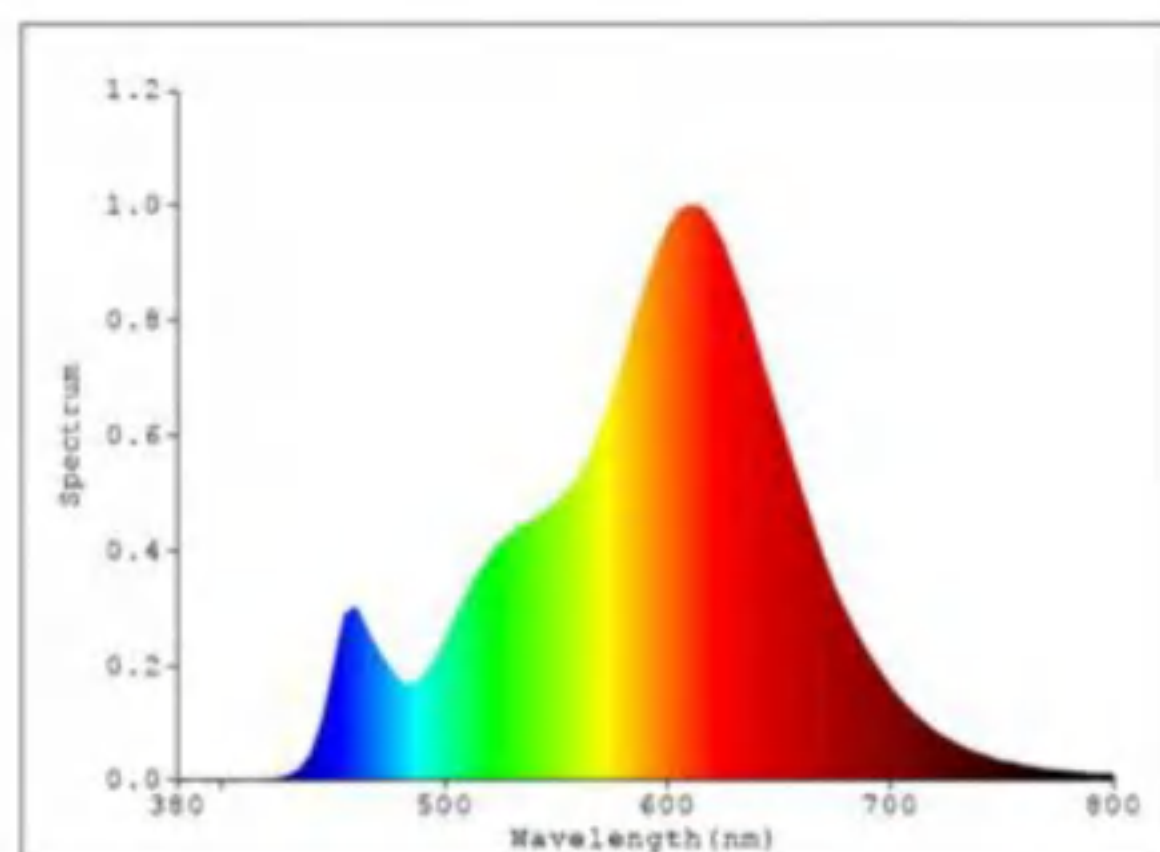

Applicable poultry: broilers, chicks, breeders

A-8.Special poultry light

Laying hens and broilers are affected by the color of the light. Professional lighting can promote production and reduce diseases.

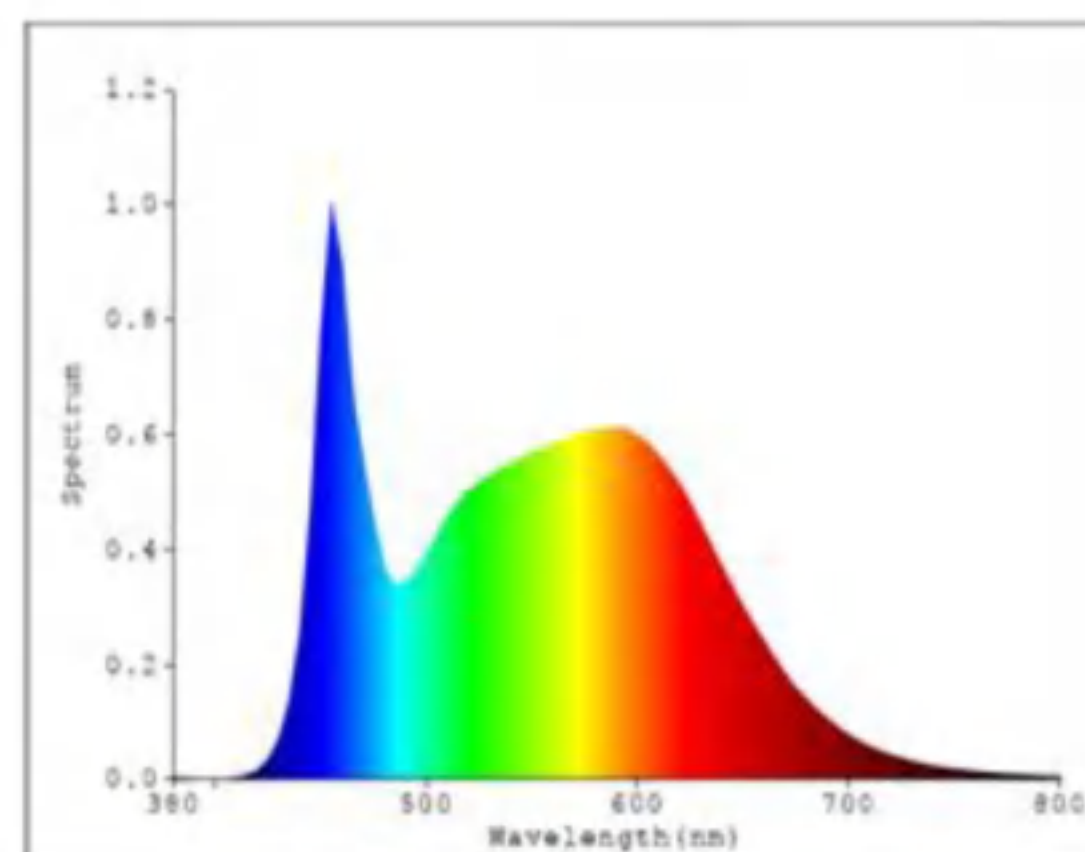

Effect of Light Color on Layer

2700K COLOR SPECTRUM

- **Red color**
enhance egg production
activates movement
stimulate the appetite
increase food intake
accelerate sexual development
- **Green light and red light** improve egg quality

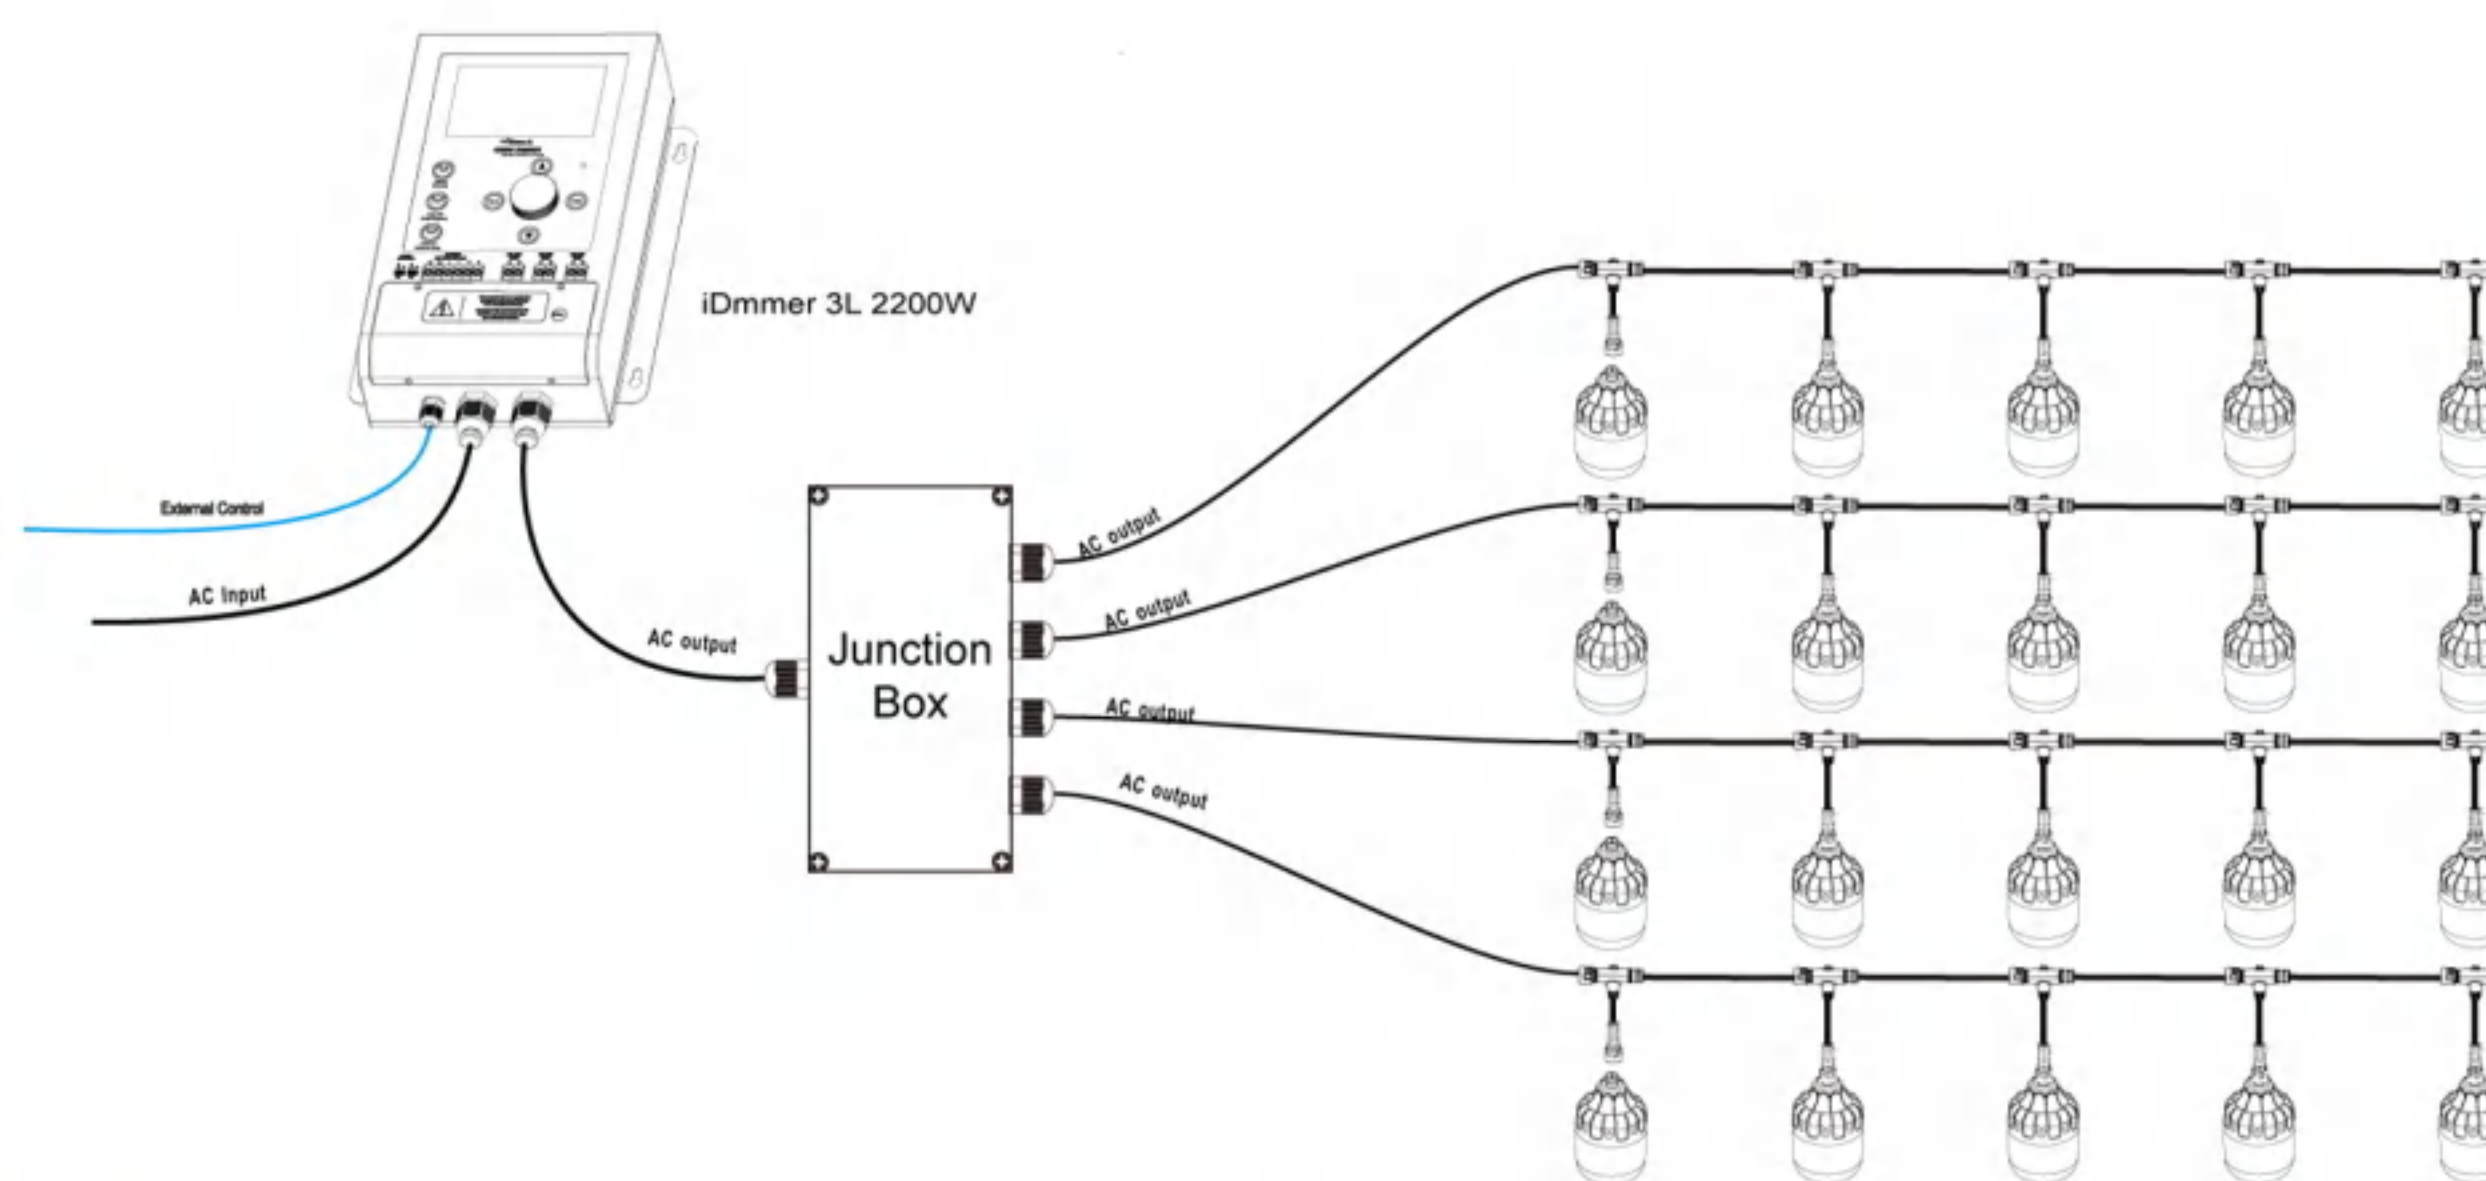

Effect of Light Color on Broiler

5000K COLOR SPECTRUM

- **Blue color**
Blue color decrease movement when catching the chicken, make it not frightened then improve the quality of chicken meat.
- **Red color**
increase food intake, reduces the feather pecking of chick
- **Green color**
increases growth rate at an early age by enhancing proliferation of skeletal muscle satellite cells

Conventional Broiler Chicken Cage

HT-B-A33

HT-B-32A

HT-B-32

Differences of three types broiler cage:

- HT-B-A33: A type broiler cage, 3 tiers, 72 birds/set
- HT-B-32A: H type broiler cage, with manure conveyor belt system that can clean chicken manure automatically
- HT-B-32: H type broiler cage, with manure tray, which is used to collect chicken manure. And you need to clean the manure tray by manual.

Specifications of broiler cage:

- Material: Q195 or Q235 carbon wire
- Surface treatment: hot-dipped galvanized (15-20 years lifespan)
- Accessories: cage frame, feeder trough, water pipe, nipple drinker, water tube, feed tube, manure tray, PVC belt, M staples, plier, gloves, plastic feet mesh, etc

Specification of Broiler Chicken Cage

B-4.Semi-automatic feeding machine

HIGHTOP[®] CHICKEN CAGE

High work efficiency, feed 10000 chicken need 30mins, speed can be adjusted.
Just put the material into the machine, feeding process, no one operation.
It is battery-powered and can last 3-4 days on a single charge.

For A type cage

For H type cage

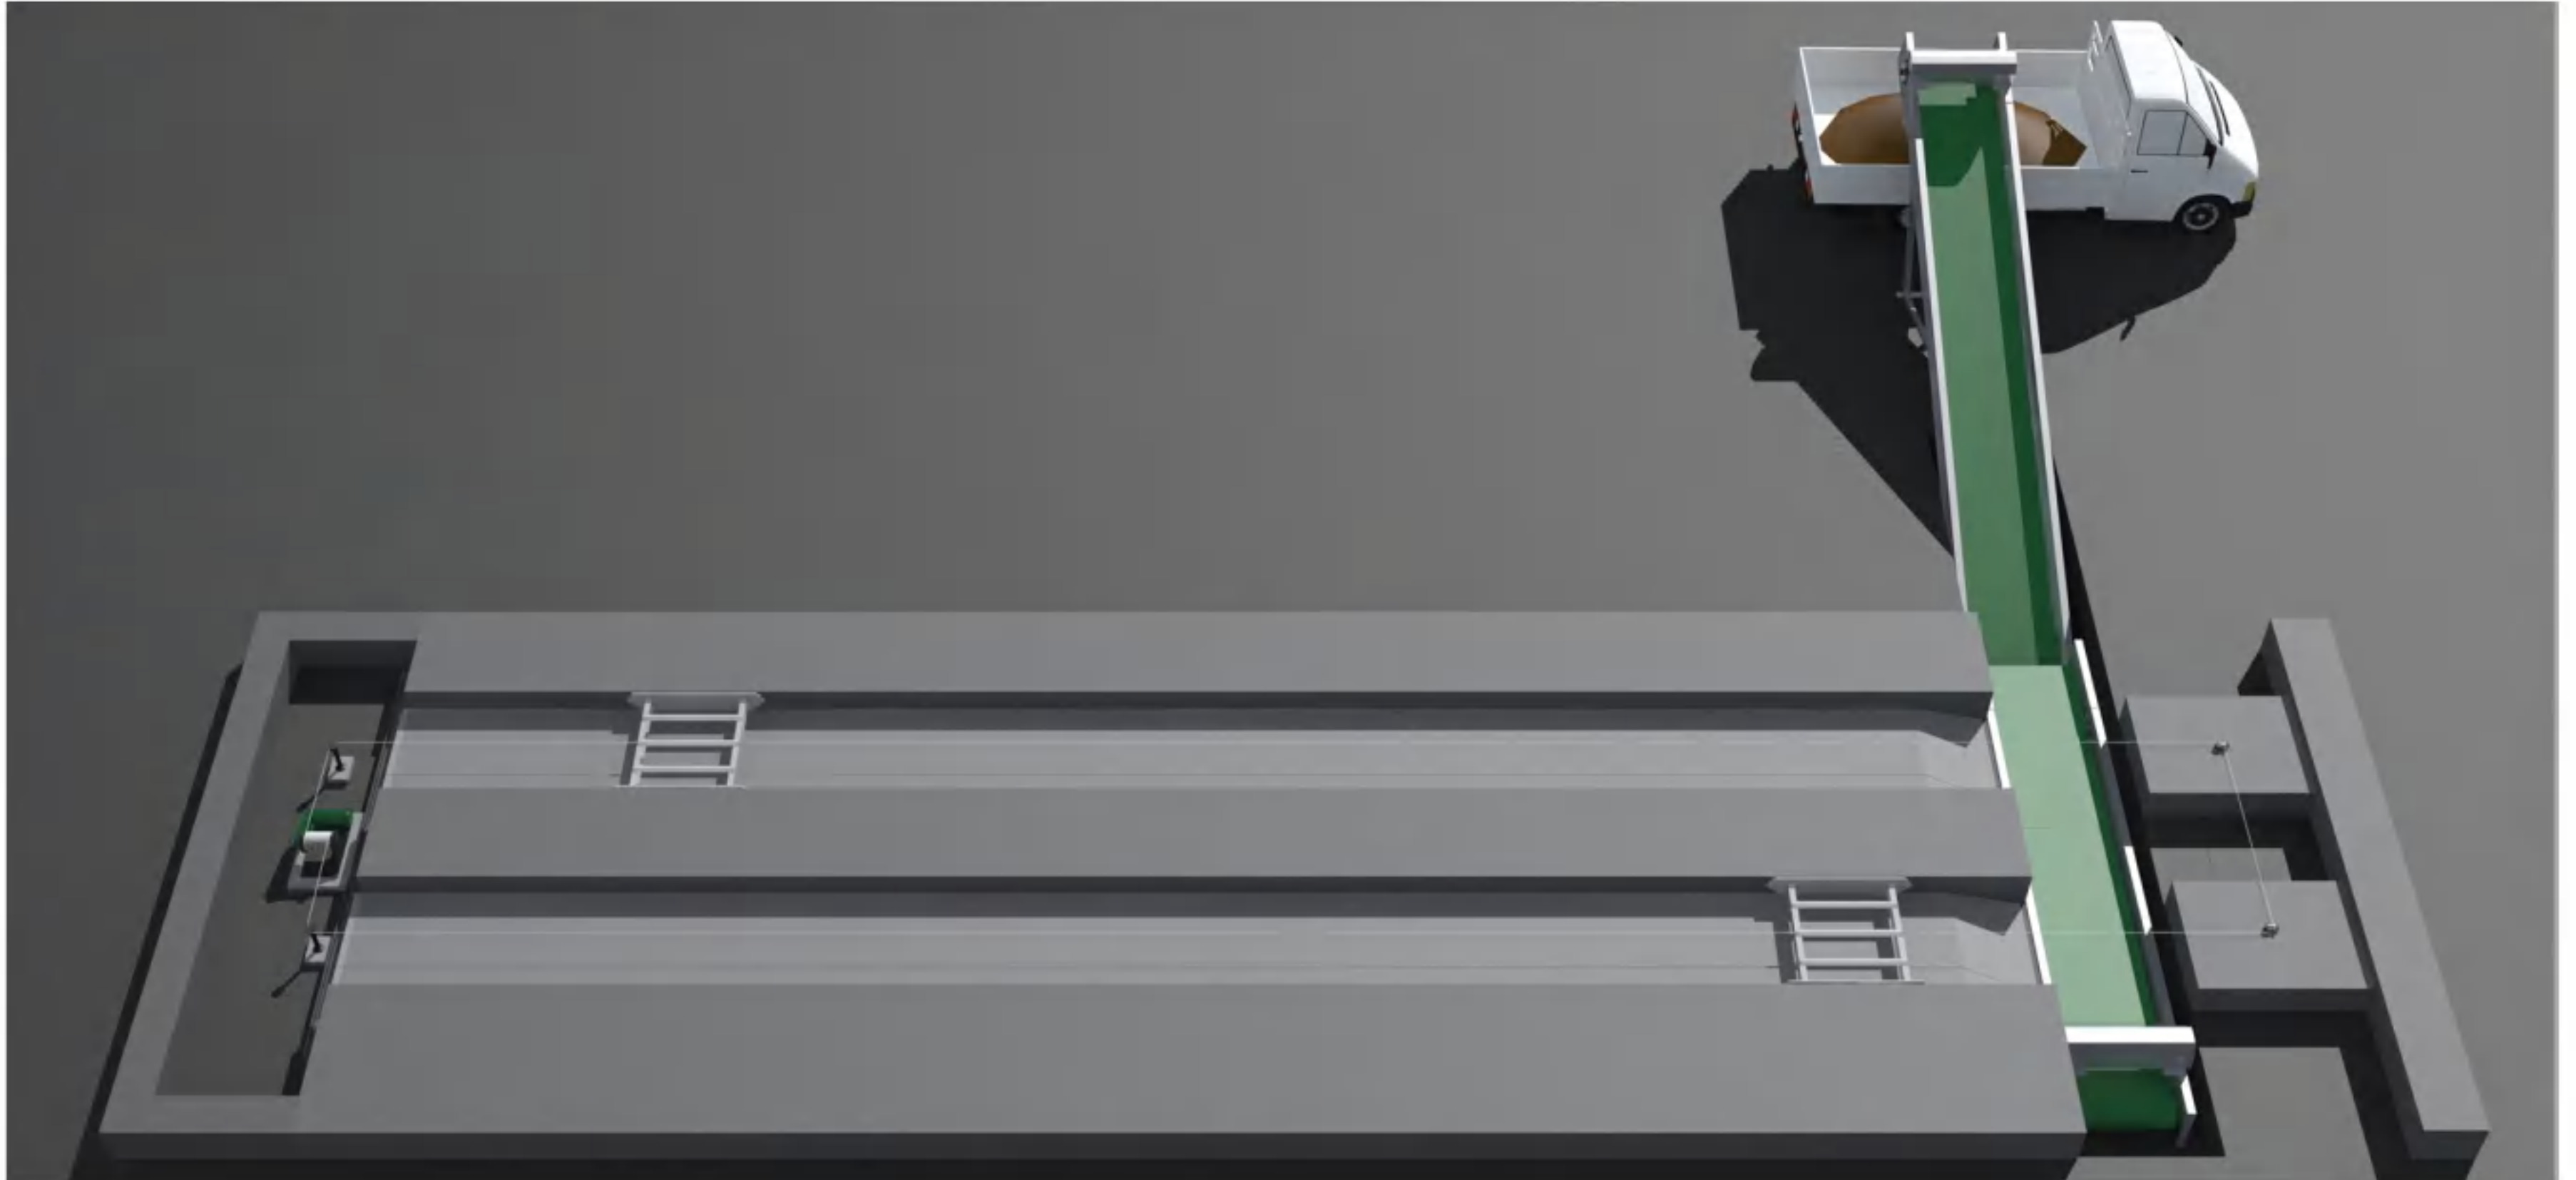

Automatic Gantry type feeding machine

Automatically feed, feed, can be used with the silo
Save labor cost
1 set used for 2-4 lines

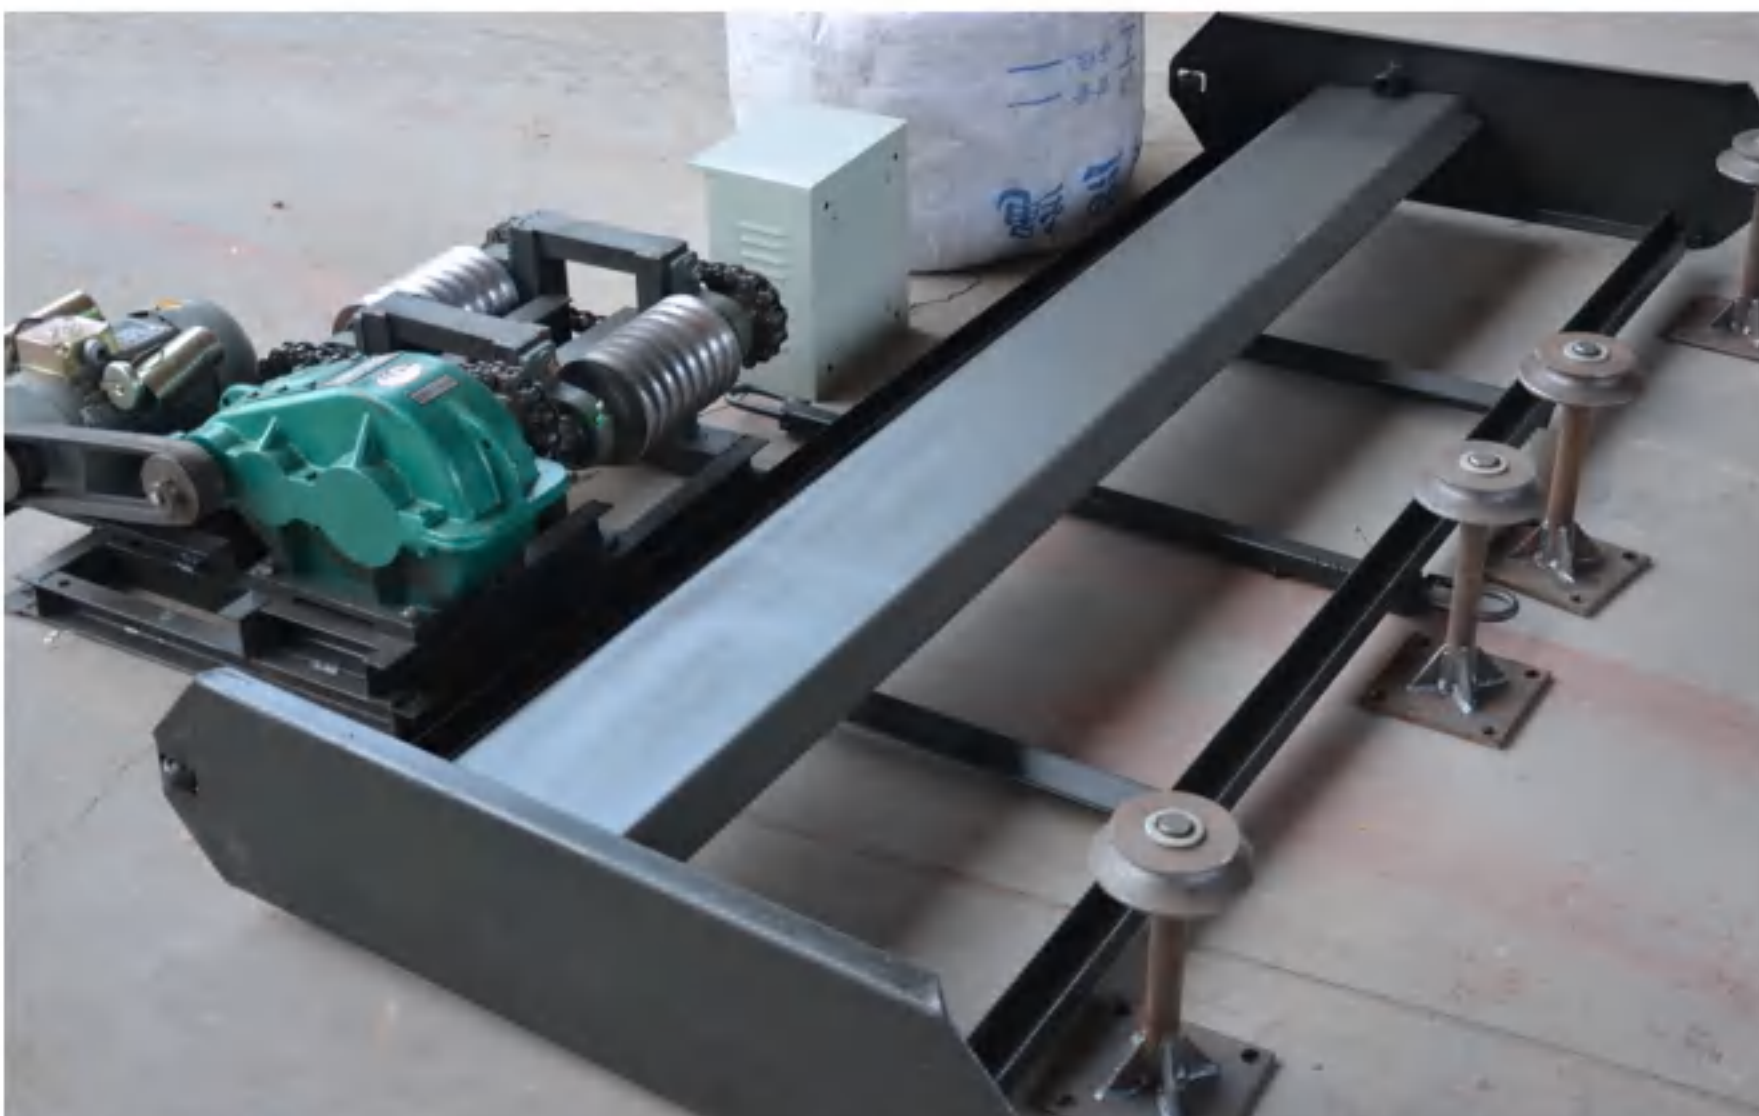

B-5. Automatic manure cleaning machine HIGHTOP® CHICKEN CAGE

Scraper type manure cleaning machine with a horizontal & slant manure cleaning belt, can realize automatic transport manure, do not need manual cleaning. Low cost, high efficiency.

E-1. Feed production machine

The machine can make fodder for all poultry and fish, pigs, cows, horses and rabbits etc. The material that can make the fodder is grain, corn, soybean and so on. It is suitable for farms and feed making factories.

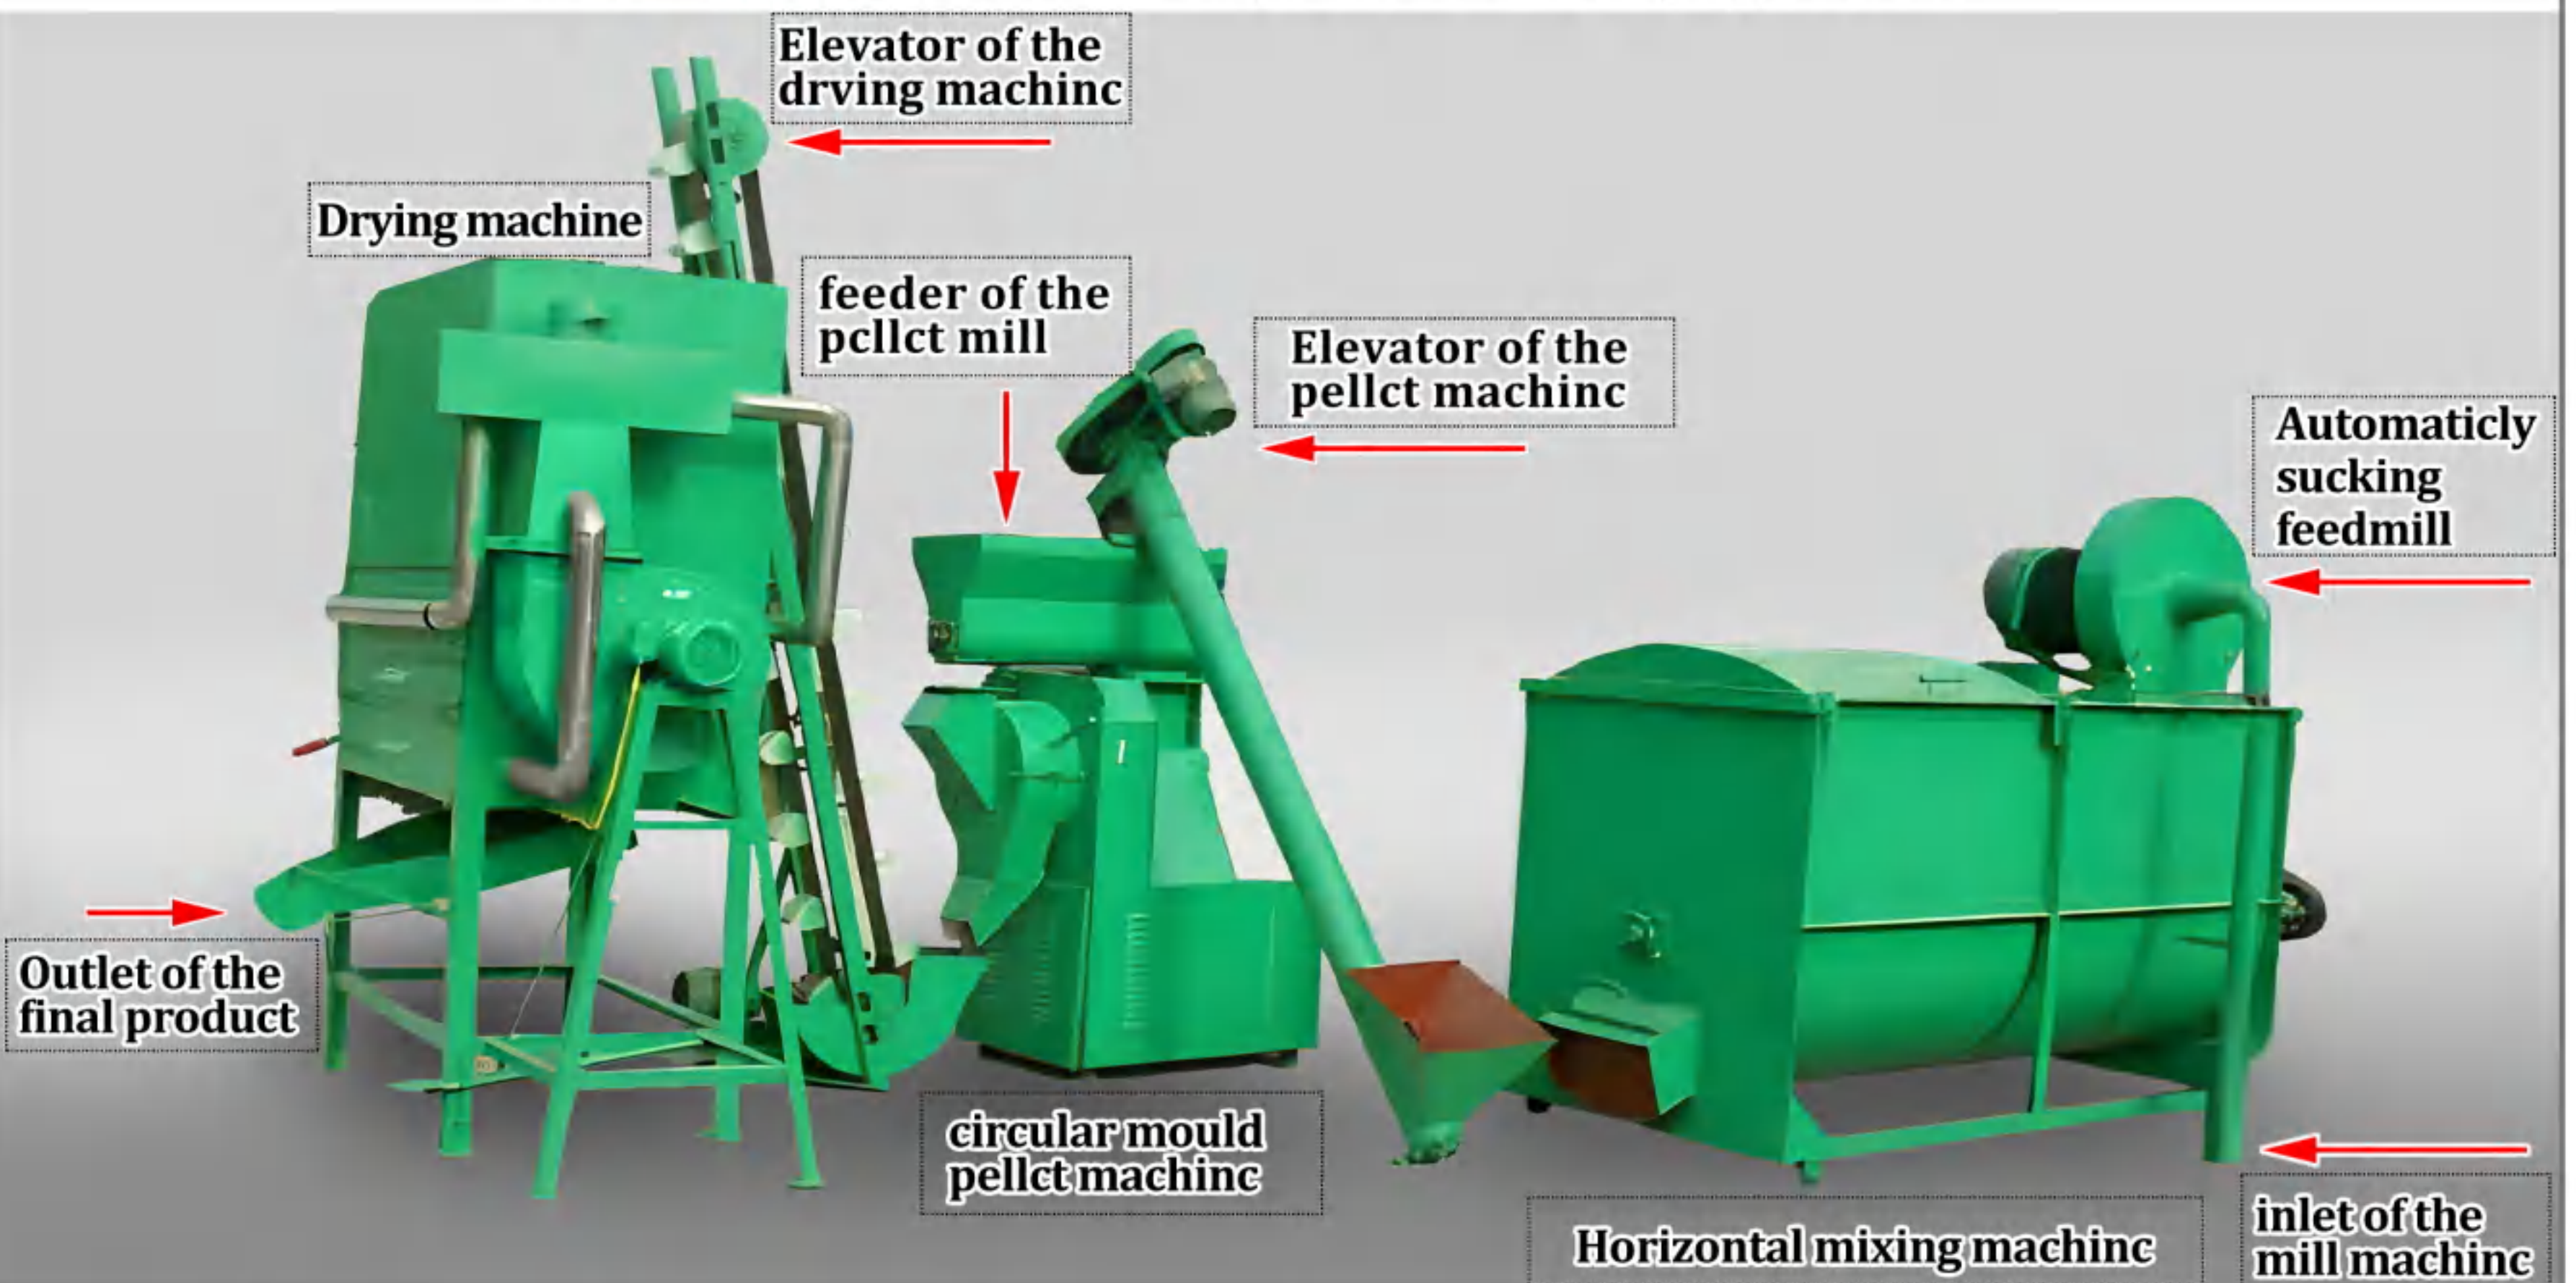

Feed mill

Pelletizer

A Set of Pellet Machine: Feedmill, Pellet machine, Drying machine

Process: Feedmill > Mixer > Elevator > Storage Silo > Pellet Machine > Elevator > Drying and Cooling Machine > Packing

E-2.Manure treatment machine

Livestock and Poultry Manure Dewatering Machine, making manure into organic fertilizer, Dry manure can be used as fertilizer after fermentation, or for fish feed, or just sell to others. Liquid manure can be used as fertilizer or source of biogas after Fermentation.

HTB-18

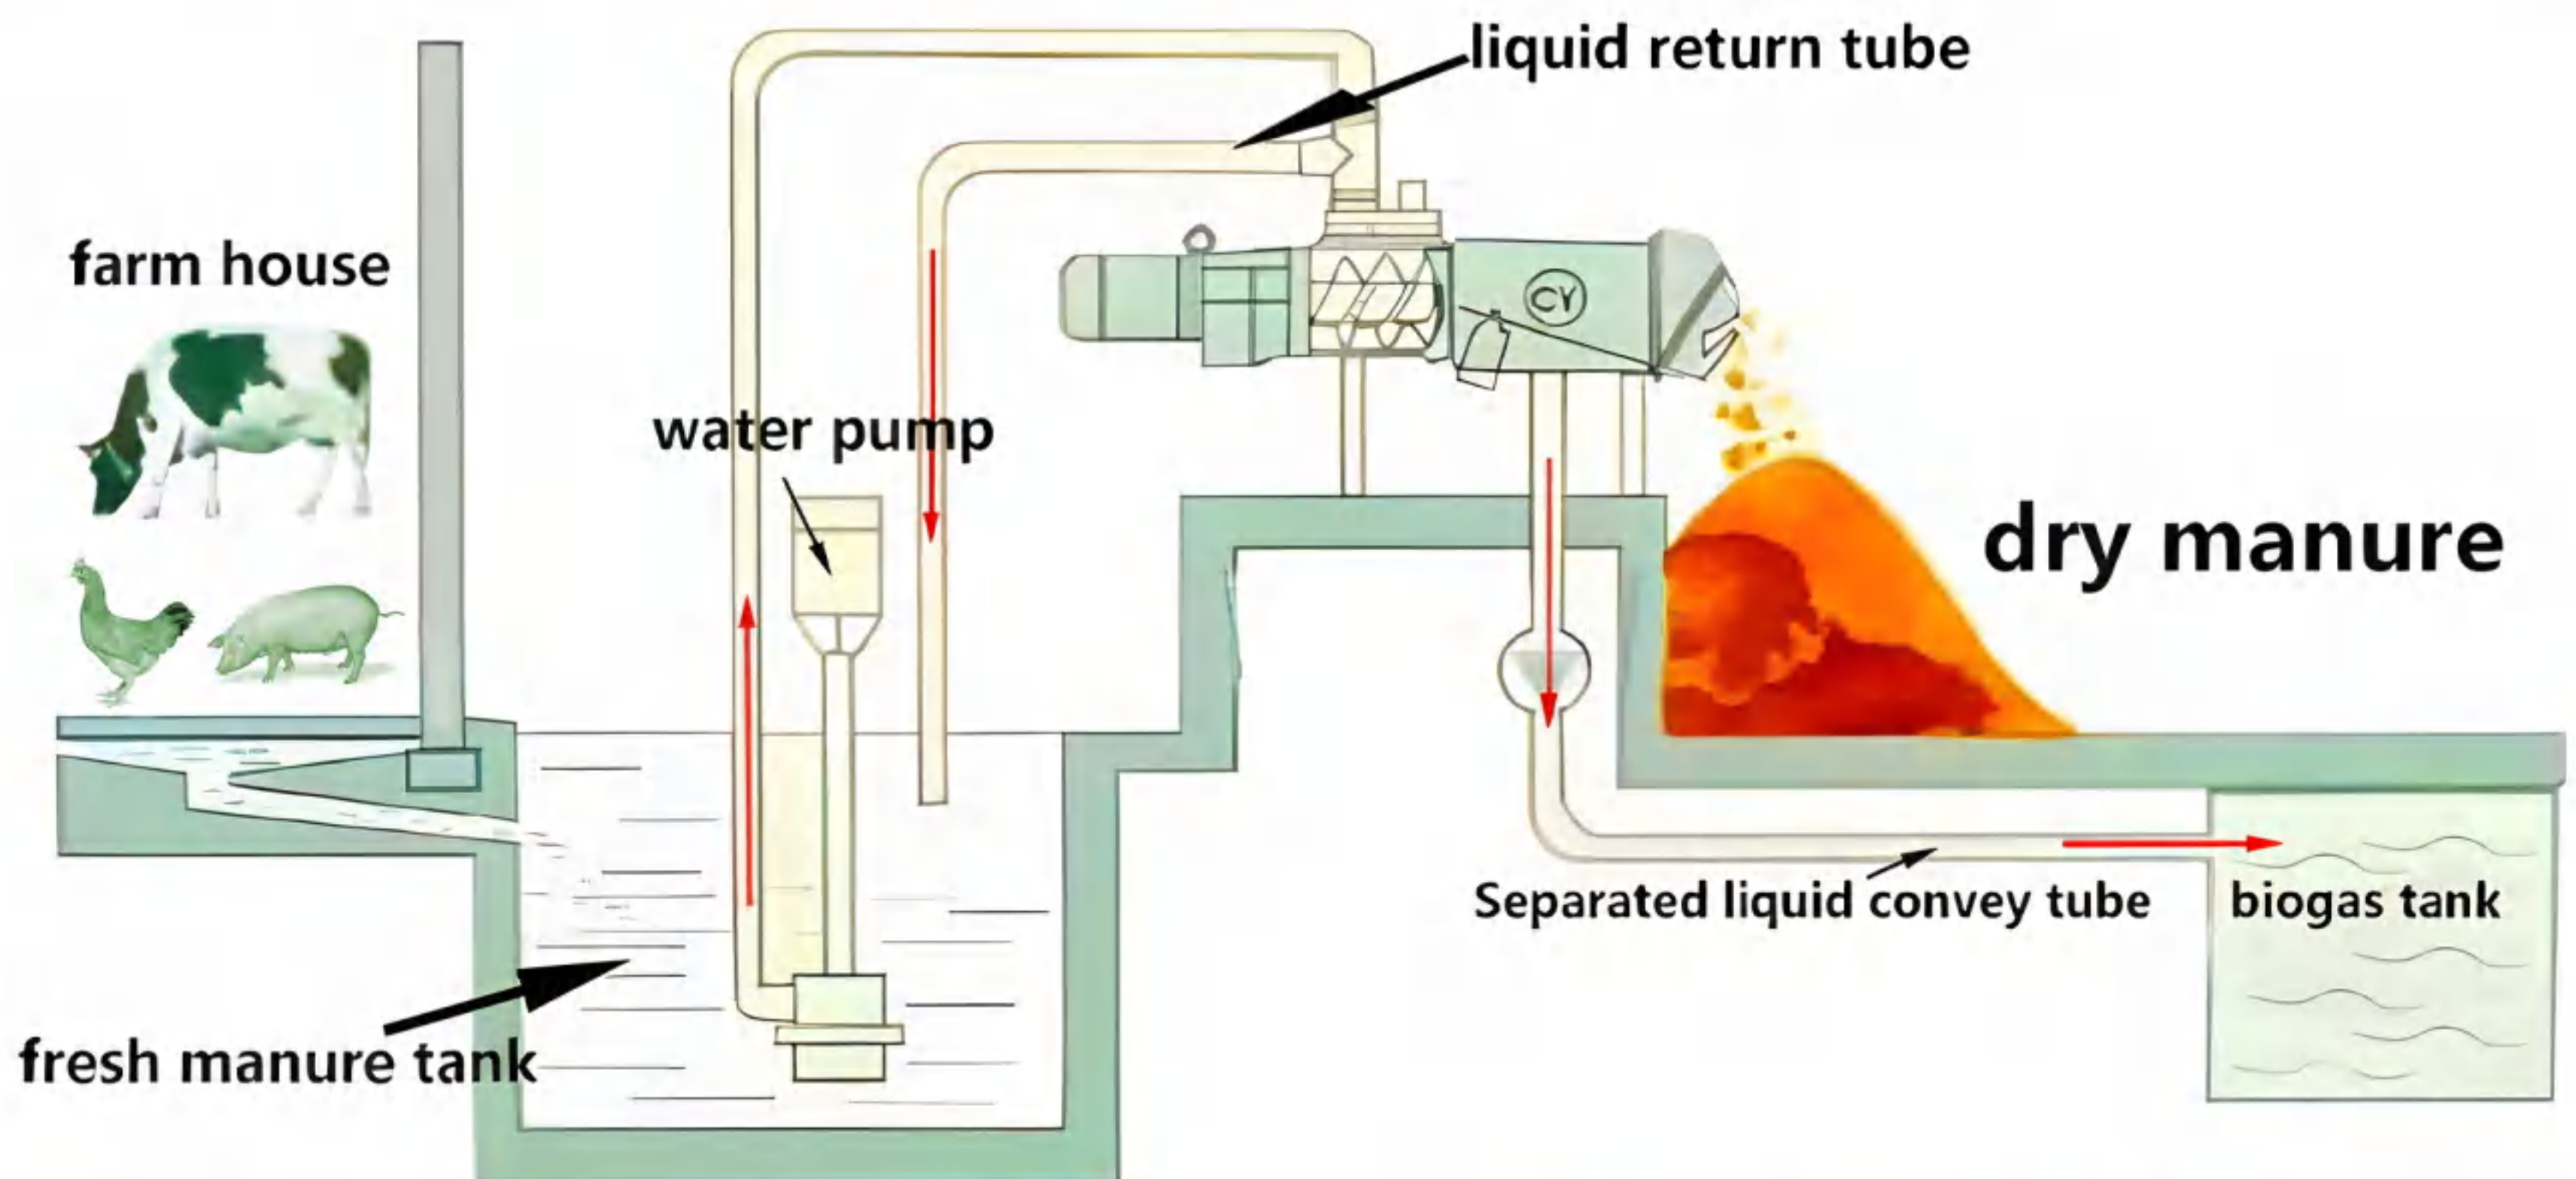

Voltage: 380V, 3 phases
Dewatering motor: 4KW
Power of Pump : 4KW
Diameter of Screen : 175MM
Inlet of manure : 76MM
Drain outlet : 110MM
Material : 304 stainless steel
Input of fresh manure : 15-17m³/h
Output of dry manure: 2m³/h

HTB-20/40/60

Voltage: 380V, 3 phases
Dewatering motor: 4 KW
Power of Pump : 2.2-5.5KW
Material : 304 stainless steel
Input of fresh manure : 20-60m³/h
Output of dry manure: 2-6m³/h
Moisture: 25%-30%(adjustable)

E-4.Slaughter equipment

Suitable for chickens, geese, ducks and birds. Provide different equipment according to different capacities and needs

1. The body is made of all 304 stainless steel.
2. High efficiency & Low water and energy consumption.
2. Easy to operate.

1.small capacity plucker and scalding machine

Capacity: 2-10 chickens per time

Plucker

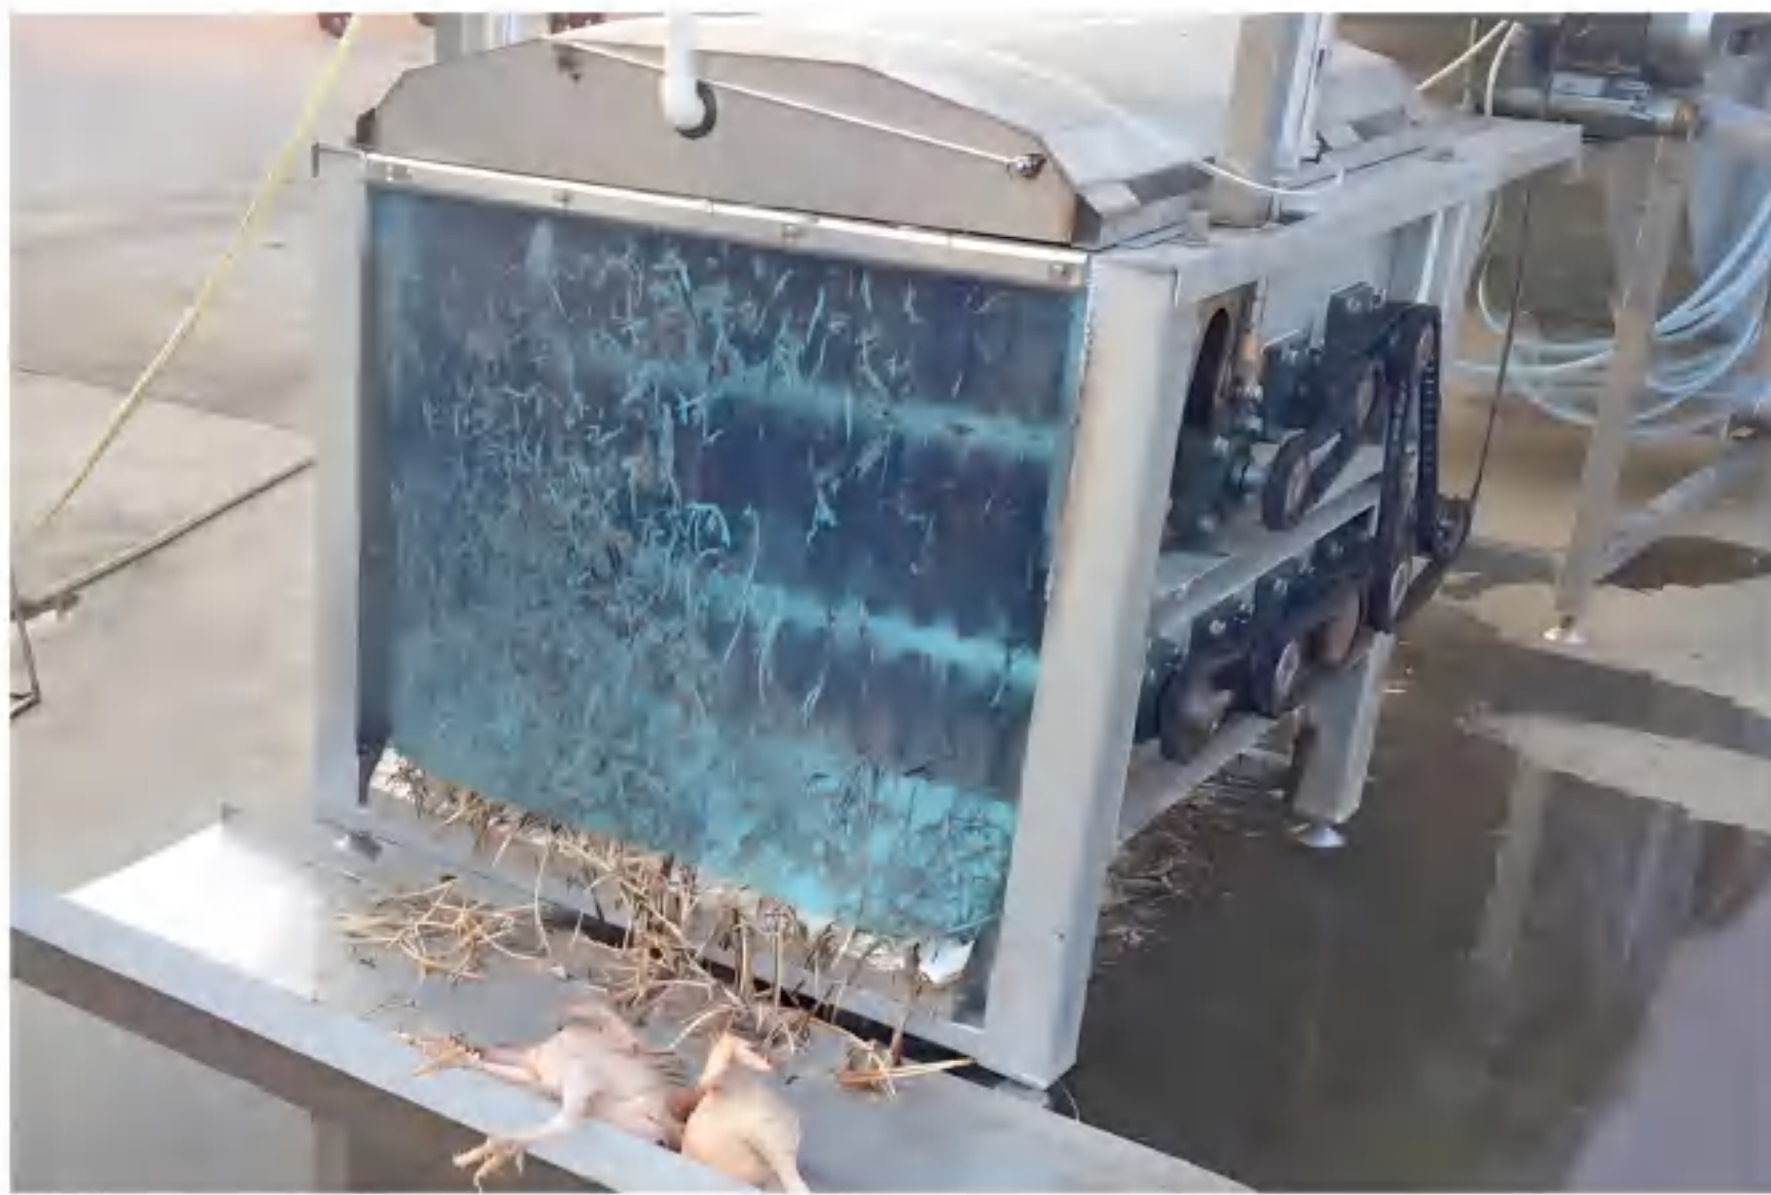

scalding

Killing cone

2.Middle capacity poultry scalding and plucking machine

Capacity: 150-500 chickens per hour

3.Large scale slaughter processing line

Capacity: 500-8500 chickens per hour

Hang the chicken on the pothook

Electric stunning

Soaking and scalding machine

Unhairing machine

Trimming

Precooling machine

Separate machine

Vacuum package machine

E-5.Heating machine

HIGHTOP® CHICKEN CAGE

Infrared raylight

- 1) The price is cheap
- 2) Save energy
- 3) Easy for installation

Gas type heater

- 1) Flameless Catalytic Combustion
- 2) Direct radiation heating objects
- 3) Heat transfer conversion rate about 95%
- 4) Safe and easy to install
- 5) Normal continuous use could up to 10,000 hours or more.

Electric type heater

- 1) Automatically and thermostatically controlled, saving in labor.
- 2) No poison air, more healthy to animal
- 3) Unique 4 fans spread the heat to the around and keep the room temperature evenly.
- 4) Easy to install, environmentally friendly and pollution-free

Diesel type heater

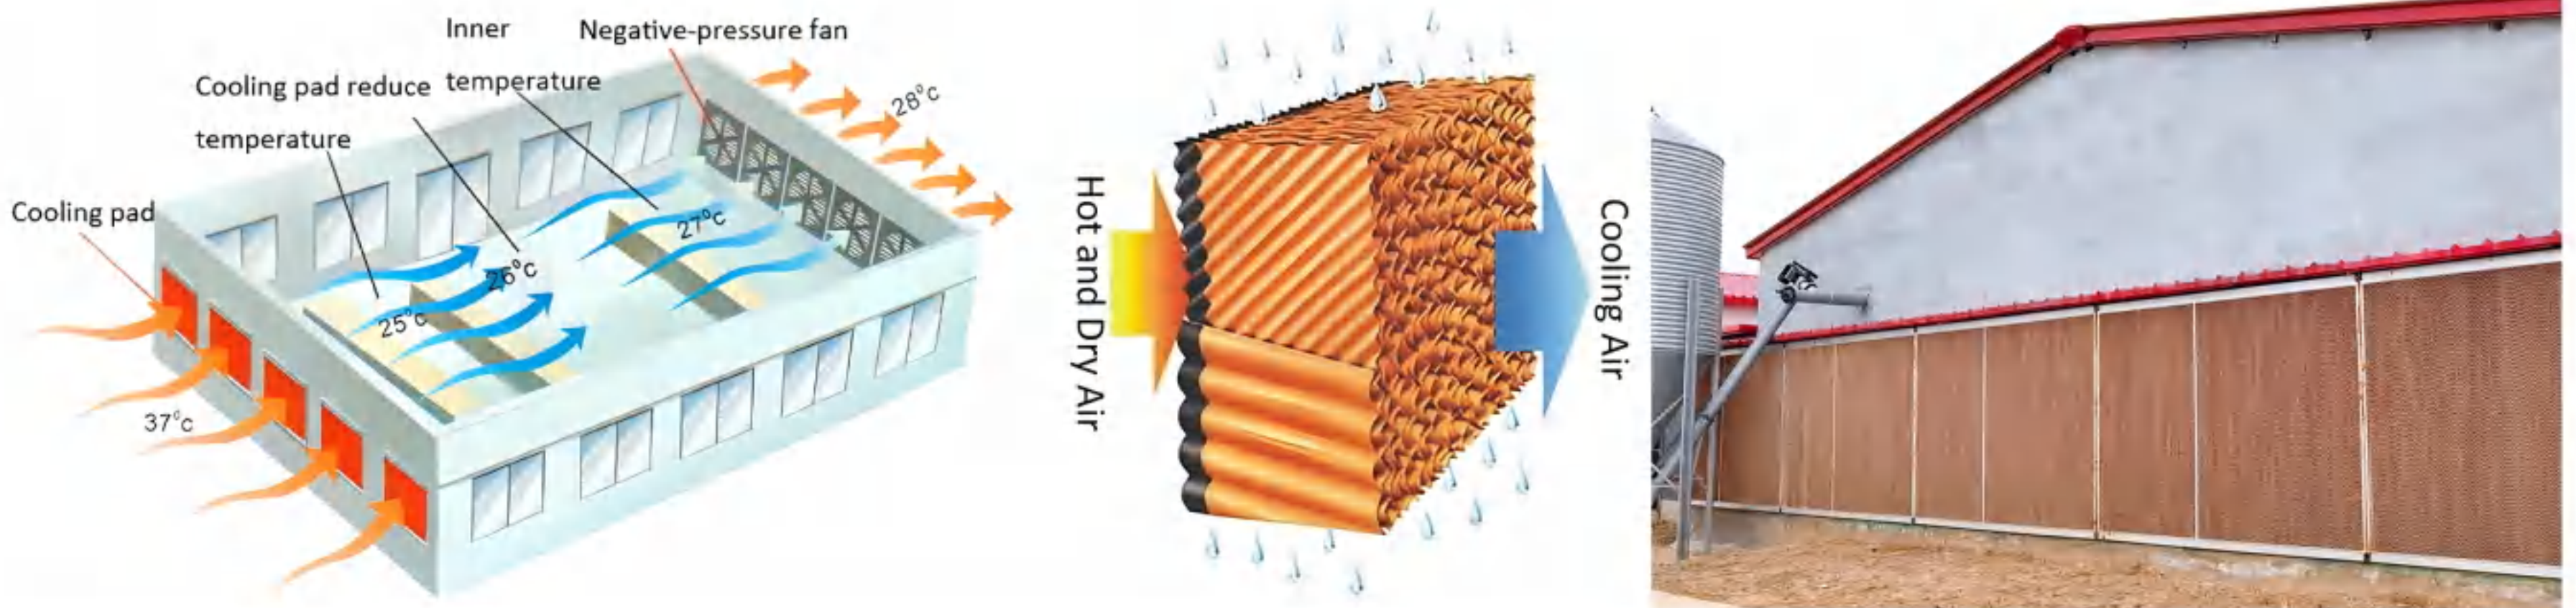

- 1) Unique ,tough and portable design,high quality wheel.
- 2) Fuel burning more sufficiently,no smell.
- 3) Stainless steel combustion chamber with fan cooling
- 4) LCD digital control panel,there's time switch
- 5) Cut-off protection,re-plugged in will not work automatically

E-6. Cooling machine

Working principle: According to the natural phenomena: " heat is absorbed when water is evaporated; efficiency of evaporation depends on the evaporation area." When hot air passed through evaporative cooling pad, heat is largely absorbed by water evaporation. Thus, temperature reduction is achieved. The cooling pad will use together with the exhaust fan. the drier air at low relative humidity, the greater the ability of evaporation to take place.

1. Cooling pad

2. Exhaust fan

3. Mistorizer

E-7. Disinfection machine

HIGHTOP[®] CHICKEN CAGE

1. It can replace the traditional artificial immune way and improve work efficiency dozens of time.
2. By changing different diameter of nozzle and controlling the particles precision, the purpose is to meet all kinds of poultry spray immune work.
3. Unique air pressure automatic control design ensures that use of vaccine without leakage.
4. Portable work state can be flexible to adjust the immune angle to the overall immune effect.
5. Wireless thermostatic control display system can effectively maintain the active vaccine.

1. Portable type

2. Stationary type

E-8. Egg tray making machine

The whole production line include pulp making system + egg tray molding system + egg tray drying system + egg tray packing system. We have capacity from 1000 to 6000pcs/h. Overview of the manufacturing process, egg tray machine, you can see the working process trough our Youtube vedio: https://youtu.be/6_uK-wQtSPg
